

Life of a Log Guide – Version 7.3 (TLM GUIDE)

LogRhythm is a world leader in NextGen SIEM, empowering organizations on six continents to successfully reduce risk by rapidly detecting, responding to and neutralizing damaging cyber threats. The LogRhythm platform combines user and entity behavior analytics (UEBA), network traffic and behavior analytics (NTBA) and security automation & orchestration (SAO) in a single end-to-end solution. LogRhythm's Threat Lifecycle Management (TLM) workflow serves as the foundation for the AI-enabled security operations center (SOC), helping customers measurably secure their cloud, physical and virtual infrastructures for both IT and OT environments. Built for security professionals by security professionals, the LogRhythm platform has won many accolades, including being positioned as a Leader in Gartner's SIEM Magic Quadrant. www.logrhythm.com. The following diagram illustrates the route a log takes through components and configurations.

- GATHER DATA
- DISCOVER
- QUALIFY
- INVESTIGATE
- NEUTRALIZE
- RECOVER
